EDUCATION

University of Southern California

Expected May 2023

Bachelor of Science in Computer Science with Economics Minor - **GPA - 3.93**

Los Angeles, CA

COURSEWORK

- Software Development
- Embedded Systems
- Web Development
- Data Structures & OOPS
- Discrete Methods
- Artificial Intelligence
- Algorithms

PROJECTS

MechRec | [Apache Tomcat Server](#), [JavaScript](#), [jQuery](#), [Java](#), [HTML](#), [CSS](#), [MySQL](#)

December 2021

- Built logic of read/insert/join tables in MySQL and Java back-end to access data between different data sets
- Used JavaScript and jQuery to build an animated slideshow showing post features and HTML and CSS to design the content of the main and company pages [Video Demo](#)

Delivery System | [Java](#)

November 2021

- Built a multi-threaded networking Java application for delivery drivers
- Server built to create threads for each of the deliveries and communicate with the client (driver) to add orders and receive notification when finished with delivery
- Used Yelp API to verify the existence of the restaurant for the orders and the location of the restaurants

Stock Trade Simulation | [Java](#)

October 2021

- Developed a multi-threaded Java application that simulates a stock trade and handles concurrency issues
- Read in a CSV file containing trade schedule and a JSON file that contains stock information to perform simulation
- Simulated how a fast a trade would work with a restriction of the number of stockbrokers

Work Experience

Republic of Korea Air Force

September 2017 – August 2019

Translator, Flight Armorer, Administrative Clerk at Flight Headquarters

Busan, Republic of Korea

- Automated maintenance task and manpower management with an excel based program: awarded squadron commander's award certificate for distinguished service
